PROFILE

Computer Engineering graduate currently pursuing a master's degree, with hands-on experience in software development and a strong interest in AI. From building React and Java apps and mobile tools to experimenting with modern AI models and LLMs, I'm driven by curiosity and enjoy tackling new challenges through hackathons and personal projects. You can explore my projects and experience in more detail on my personal portfolio website: valentin-bejan-cv.vercel.app/en

WORK EXPERIENCE

Software Development Intern

Thecon

Jan 2024 – Mar 2024 Galați, Romania

- Developed web application features in JavaScript and React over a three-month industry internship.

Web Development Intern

Still-Co

Jun 2023 – Jul 2023 Galați, Romania

- Built and styled web interfaces with JavaScript and React during a three-week internship.

Romanian AI Content Expert (Freelance)

Lilt

Jan 2026 – Present Remote

Evaluate and improve Romanian-language AI training data and content quality.

HACKATHONS

VibeScout – TheCon 2025

github.com/Valentinbejan/thecon-2025

Solo entry: venue-discovery app with maps, filters and an AI chatbot. 4th of ~30 teams and best one-person project; the top three were multi-person teams.

React Native Expo TypeScript Supabase

FutureForge – ACIEE Hackathon 2024

aciee.ugal.ro/studenti/hackathon

Team entry: Raspberry Pi facial-recognition system with local and remote alerting and a live-video GUI showing per-match accuracy.

Raspberry Pi Computer Vision Facial Recognition

TECH SKILLS

Java & Backend

Java 17 Spring Boot Spring Data JPA
Hibernate REST APIs JUnit
Gradle Swagger/OpenAPI Docker
Git

Databases

PostgreSQL pgvector Prisma
MySQL Oracle SQL Plus

Frontend & Mobile

React Next.js JavaScript
TypeScript React Native

Other Languages

Python C#

AI & Tooling

RAG Ollama LLM APIs LangChain
LLM fine-tuning ComfyUI
Image LoRA training Stable Diffusion

EDUCATION

MSc, Advanced Information Technologies

Faculty of Automatics, Computers, Electrical and Electronics Engineering

09/2025 – Present Galați, Romania

BSc, Computers and Information Technology

Faculty of Automatics, Computers, Electrical and Electronics Engineering

10/2021 – 07/2025 Galați, Romania

Baccalaureate – Mathematics-Informatics

“Dunărea” Theoretical High School

2017 – 2021 Galați, Romania

LANGUAGES

Romanian (Native)
English (C1)

PROJECTS

Java & Backend

Vessel Management System

 [vessel-management-system](#)

Spring Boot REST API: many-to-many ship-owner relationships, full CRUD, PostgreSQL, JPA/Hibernate, Swagger docs and integration tests.

Java 17

Spring Boot

PostgreSQL

JPA

Gradle

Swagger

Electrical Appliances Manager

 [AparateElectricce](#)

Java desktop application for managing an appliance catalogue: filtering by price, colour and producer, with data import/export.

Java

OOP

File I/O

Baccalaureate Exam Management

 [BaccalaureateProject](#)

Java application managing exam registrations, grades and role-based access for administrator and student users.

Java

OOP

Access Control

AI & Data Tools

LLM UI — Chat with RAG

 [ollama-ui-llm-rag](#)

📅 2025

Bachelor's thesis: self-hosted chat UI for local LLMs. Next.js over PostgreSQL 16 + pgvector, with RAG across conversation history, document ingestion, web search and TTS. Ships an ORPO fine-tuning pipeline for a custom Llama 3.2 1B.

Next.js 15

TypeScript

PostgreSQL

pgvector

Prisma

Ollama

RAG

OCR Web Application

 [flask-ocr-celery-app](#)

Text extraction from uploaded images, with long-running OCR jobs handled by an async worker queue.

Flask

Celery

Tesseract

Docker

Excel AI Agent

 [langgraph-excel-agent](#)

Reads and modifies Excel workbooks from natural-language instructions, with automatic backups before each write.

LangChain

LangGraph

Python

OpenRouter API

LLM VRAM Calculator

 [llm-vram-calculator](#)

Estimates VRAM requirements for LLM inference and fine-tuning across model sizes, quantization formats, context lengths and tuning methods.

Next.js 14

TypeScript

Tailwind CSS

LLM

Japanese Voice Studio

 [irodori-tts-studio.vercel.app](#)

Text-to-speech studio with a Next.js frontend and a serverless Modal GPU backend, featuring WASM audio clean-up and WebGPU transcription.

Next.js

Modal

WASM

WebGPU

Cloudflare R2

Maritime DB Monitor

 [maritime-db-monitor](#)

AI-powered PostgreSQL health dashboard: a daemon collects metrics and logs, and a context-aware LLM analyses schemas, execution plans and vacuum tuning.

Python

PostgreSQL

Streamlit

Docker

LLM

Coin Detection & Counting

 [Demo video on LinkedIn](#)

Detects and counts coins in an image using classical computer vision.

Python

Computer Vision

Web & Mobile

Food Ordering App

 [Food-Ordering-App](#)

Mobile app for managing products and orders, with separate user and administrator roles.

React Native

Expo

Supabase

Recipe App

 [recipe-app](#)

Recipe browser on the Spoonacular API, with per-user saved favourites.

React

Node.js

Prisma

Echoes of Solitude

 [Using_AI_in_game_creation](#)

Narrative video game with all assets — art, audio and script — generated using AI tooling.

Unity

AI

♥ Beyond Code

Animation & video editing — YouTube channel of animations built in Blender, Premiere Pro and After Effects:  [@Valentinebej](#)
