ABOUT MYSELF

Computer Engineering graduate currently pursuing a master's degree, with hands-on experience in software development and a strong interest in AI.

From building React and Java apps and mobile tools to experimenting with modern AI models and LLMs, I'm driven by curiosity and enjoy tackling new challenges through hackathons, freelance work, and personal projects.

You can explore my projects and experience in more detail on my personal portfolio website:

WORK EXPERIENCE

Intern

Thecon

08 Jan 2024 – 29 Mar 2024

Galați, Romania

- During this program, I gained practical knowledge and skills in web development using **JavaScript** and **React**.

Intern

Still-Co

26 Jun 2023 – 14 Jul 2023

Galați, Romania

- I completed a 3-week internship, working 6 hours per day.
- I gained practical knowledge and skills in web development using **JavaScript** and **React**.

SIDE HUSTLES & FREELANCING

Romanian AI Content Expert

Lilt

Jan 2026 – Present

Remote

- Contribute to AI training and content quality improvement for Romanian language tasks as part of Lilt's AI content expert program.

EDUCATION & TRAINING

Master's Student

Faculty of Automatics, Computers, Electrical and Electronics Engineering

09/2025 – Current

Galați, Romania

Specializing in Advanced Information Technologies (TIA).

Bachelor of Science

Faculty of Automatics, Computers, Electrical and Electronics Engineering

10/2021 – 2025

Galați, Romania

Specializing in Computers and Information Technology (CTI).

Baccalaureate Diploma

"Dunărea" Theoretical High School

2017 – 2021

Galați, Romania

Focus on Mathematics-Informatics.

Certificate of professional informatics skills.

TECH SKILLS

Programming

React

JavaScript

Java

C#

Python

Artificial Intelligence

Stable Diffusion (training)

LLM models

Databases

Oracle SQL Plus

MySQL

PostgreSQL

Graphics

Blender

Premiere Pro

After Effects

A Z LANGUAGES

Romanian

- Mother tongue

English

- Listening: C1 Reading: B2 Writing: B2
- Spoken Production: B2 Spoken Interaction: C1

HOBBIES & INTERESTS

Animation & Video Editing

I manage a YouTube channel for animations built with Blender, Premiere, and After Effects. – @Valentinebej

Exploration of AI Technologies

Hands-on experimentation with LLMs, text-to-image (Stable Diffusion), and TTS technologies.

</> PROJECTS

Desktop & Java Projects

Vessel Management System

github.com/Valentinbejan/vessel-...

Spring Boot REST API: many-to-many ship-owner relationships, full CRUD, PostgreSQL, JPA/Hibernate, Swagger docs, and integration tests.

Java 17

Spring Boot

PostgreSQL

JPA

Gradle

Swagger

Electrical Appliances

github.com/Valentinbejan/Aparate...

GUI for filtering appliance databases by price, color, producer. Supports import/export.

Java

Baccalaureate Exam Management

github.com/Valentinbejan/Baccal...

Manages exam data, grades, and role-based access (admin & student).

Java

Web & Mobile Apps

Pizza site

github.com/Valentinbejan/pizza

Web app for a pizzeria: user registration/login, product selection & database validation.

React

JavaScript

Food-Ordering-App

github.com/Valentinbejan/Food-O...

Mobile app for managing products and orders, with user and admin roles.

React Native

Expo

Supabase

recipe-app

github.com/Valentinbejan/recipe-app

Recipe app using Spoonacular API; users can view and save favourites.

React

Node.js

Prisma

ElephantSQL

Using_AI_in_game_creation

github.com/Valentinbejan/Using_AI_...

“Echoes of Solitude” – video game created entirely with AI.

AI

Blender

Ren'Py

VibeScout (TheCon 2025)

github.com/Valentinbejan/thecon-2025

Hackathon app: discover Romanian venues via maps, filters, AI chatbot. Solo entry—4th place overall (best 1-man project) out of ~30 teams; top 3 were multi-person teams.

React Native

Expo

TypeScript

Supabase

Registration_and_login_page

github.com/Valentinbejan/Pagina_...

Registration/login form with validation, user existence check & restricted access.

React

JavaScript

Counting coins in an image

 [LinkedIn Video](#)

Automatically detects and counts coins in an image using computer vision.

Python

Computer Vision

Machine Learning

OCR Application

[github.com/Valentinbejan/flask-...](https://github.com/Valentinbejan/flask-ocr)

Web app for OCR text extraction from images with background processing.

Flask

Celery

Tesseract

Docker

Backend & AI Tools

langgraph-excel-agent

[github.com/Valentinbejan/langgr...](https://github.com/Valentinbejan/langgraph-excel-agent)

AI agent that reads/modifies Excel files via natural language with auto-backups.

LangChain

LangGraph

Python

OpenRouter API

LLM VRAM Calculator

github.com/Valentinbejan/llm-vram-calculator

Web app that estimates VRAM for LLM inference & fine-tuning across model sizes, quantization formats, context lengths, and tuning methods.

Next.js 14

TypeScript

Tailwind CSS

LLM
